Nested Loops

Loops within loops are termed as nested loops.

Pattern Problems

The easiest way to understand the working of a nested loop is by solving pattern printing problems.

Print a solid rectangle

```
***
****
****
#include <iostream>
using namespace std;
int main() {
  int rows, columns;
   cout << "Enter the number of rows :\n";</pre>
   cin >> rows;
   cout << "Enter the number of columns :\n";</pre>
   cin >> columns;
   for (int i = 1; i <= rows; i++) {</pre>
       for (int j = 1; j <= columns; j++) {</pre>
           cout << "*";
       cout << endl;</pre>
   return 0;
```

Print a hollow rectangle

```
***
 ****
#include <iostream>
using namespace std;
int main() {
   int rows, columns;
   cout << "Enter the number of rows :\n";</pre>
   cin >> rows;
   cout << "Enter the number of columns :\n";</pre>
   cin >> columns;
   for (int i = 1; i <= rows; i++)
       for (int j = 1; j <= columns; j++)</pre>
           if (i == 1 || i == rows || j == 1 || j == columns) {
               cout << "*";
           } else {
               cout << "
       cout << endl;</pre>
   return 0;
```

Print Half Pyramid Pattern using Stars

Print an Inverted Half pyramid

```
* * * * *

* * * *

* * *

#include <iostream>
using namespace std;
int main() {
  int n;
  cin >> n;
```

```
for (int i = n; i >= 1; i--) {
    for (int j = 1; j <= i; j++) {
        cout << "* ";
    }
    cout << endl;
}
return 0;
}</pre>
```

Print Half Pyramid after 180 degree rotation

```
*
        **
      ***
    ****
  ****
#include <iostre
using namespace std;
int main() {
   int n;
   cin >> n;
   for (int i = 1; i <= n; i++) {
        for (int j = 1; j <= n; j++) {
   if (j <= n - i) {</pre>
                cout << " ";
             } else {
                 cout << "*";
        cout << endl;</pre>
   return 0;
}
```

Print Half Pyramid using numbers

```
1
1 2
1 2 3
1 2 3 4
1 2 3 4 5
#include \( \text{iostream} \> \text{using namespace sto} \( \text{int main() } \) \( \text{int n; } \) \( \text{cin } >> n; \)

for \( (\text{int i = 1; i <= n; ++i) } \) \( \text{cout << j << " "; } \) \( \text{cout << "\n"; } \) \\ \( \text{return 0; } \) \( \text{return 0; } \)
</pre>
```

Print Inverted Half Pyramid using numbers

```
1 2 3 4 5
1 2 3 4
1 2 3
1 2
1
#include <iostream>
using namespace std;
int main() {
   int n;
   cin >> n;

for (int i = n; i >= 1; --i) {
      for (int j = 1; j <= i; ++j) {
        cout << j << " ";
      }
      cout << endl;
   }
   return 0;
}</pre>
```

Print Half Pyramid using numbers - 2

```
2 2
3 3 3
4 4 4 4
5 5 5 5 5
#include <iostream>
using namespace std;
int main() {
```

1

```
int n;
cin >> n;
for (int i = 1; i <= n; i++) {
    for (int j = 1; j <= i; ++j) {
        cout << i << " ";
    }
    cout << endl;
}
return 0;
}</pre>
```

Print Inverted Half Pyramid using numbers - 2

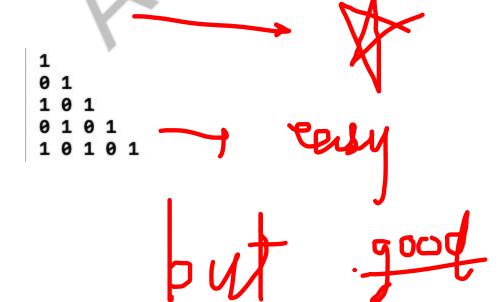

```
1 1 1 1 1
2 2 2 2
3 3 3
4 4
5
```

```
#include <iostream>
using namespace std;
int main() {
   int n;
   cin >> n;
   for (int i = 1; i <= n; i++) {
      for (int j = 1; j <= n - i + 1; ++j) {
        cout << i << " ";
      }
      cout << endl;
   }
   return 0;
}</pre>
```

Print Floyd's Triangle

```
1
2 3
4 5 6
7 8 9 10
 11 12 13 14 15
#include <iostream>
using namespace std;
int main() {
  int n;
   cin >> n;
   int number = 1;
   for (int i = 1; i <= n; i++) {
       for (int j = 1; j <= i; j++) {
           cout << number << " ";</pre>
           number++;
       cout << endl;</pre>
   }
   return 0;
}
```

Print 0-1 pattern

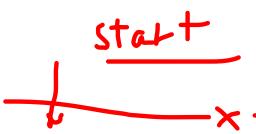

```
using namespace std;
int main() {
    int i,j,r;
    cin>>r;
    for(i=1;i<=r;i++)
        for(j=1;j<=i;j++)
            if((i+j)%2==0)
                cout<<" 1";
            else
                cout<<" 0";
        cout << endl;
    }
    return 0;
}
Pattern - 5 Palindromic pattern
                                      Gind
#include<iostream>
using namespace std;
int main(){
```

#include<iostream>

```
\quad \textbf{int} \ i,j,r;
cin>>r;
for(i=1;i<=r;i++)
{
   int k=i;
   for(j=1;j<=(r-i);j++)
   {
      cout<<" ";
   }
   for( ;j<=r;j++)
   {
      cout<<k<<" ";
      k--;
   }
   k=1;
   \textbf{for}(\ ;j{<}(r{+}i){;}j{+}{+})
      k++;
      cout<<k<<" ";
   }
   for( ;j<=(2*r-1);j++)
   {
     cout<<" ";
   }
   cout<<endl;
}
```

return 0;

Advanced Pattern Problems

Print Diamond using Stars: Given n, print diamond with 2*n rows.

```
*
     ***
   ****
  *****
 *****
 *****
  *****
   ****
     ***
#include <iostream>
using namespace std;
int main() {
  int n;
  cin >> n;
  int space = (2 * n - 1) / 2;
  for (int i = 1; i <= n; i++) {
```

```
for (int j = 1; j <= space; j++) {</pre>
           cout << " ";
       for (int j = 1; j \le 2 * i - 1; j++) {
           cout << "*";
       cout << endl;</pre>
       space--;
   }
   space = 0;
   for (int i = n; i >= 1; i--) {
       for (int j = 1; j <= space; j++) {</pre>
           cout << " ";
       }
       for (int j = 1; j \le 2 * i - 1; j++) {
           cout << "*";
       cout << endl;</pre>
       space++;
  }
  return 0;
}
```

Print Hollow Diamond using Stars

#include <iostream>

```
using namespace std;
int main() {
  int n;
   cin >> n;
   int space = (2 * n - 1) / 2;
   for (int i = 1; i <= n; i++) {
       for (int j = 1; j <= space; j++) {</pre>
           cout << " ";
       }
       for (int j = 1; j \le 2 * i - 1; j++) {
           if (j == 1 | | j == 2 * i - 1) {
               cout << "*";
           } else {
               cout << " ";
       cout << endl;</pre>
       space--;
   }
   space = 0;
   for (int i = n; i >= 1; i--) {
       for (int j = 1; j <= space; j++) {
           cout << " ";
       }
       for (int j = 1; j \le 2 * i - 1; j++) {
           if (j == 1 || j == 2 * i - 1) {
               cout << "*";
           } else {
                cout
       cout << endl;</pre>
       space++;
   return 0;
}
```

Print Hollow Diamond Inscribed in a Rectangle

```
*****
****
***
         ***
**
           **
            *
            *
**
           **
***
         ***
****
******
#include <iostream>
using namespace std;
int main() {
  int n;
  cin >> n;
  int space = (2 * n - 1)
   for (int i = 1; i <= n; i++) {
      for (int j = 1; j <= space; j++) {</pre>
          cout << "*";
      for (int j = 1; j \le 2 * i - 1; j++) {
         if (j == 1 || j == 2 * i - 1) {
             cout << "*";
           } else {
              cout << " ";
      for (int j = 1; j <= space; j++) {</pre>
          cout << "*";
      }
      cout << endl;</pre>
      space--;
   }
```

```
space = 0;
   for (int i = n; i >= 1; i--) {
       for (int j = 1; j <= space; j++) {</pre>
           cout << "*";
       }
       for (int j = 1; j \le 2 * i - 1; j++) {
           if (j == 1 || j == 2 * i - 1) {
               cout << "*";
           } else {
               cout << " ";
       }
       for (int j = 1; j <= space; j++) {</pre>
          cout << "*";
       }
       cout << endl;</pre>
       space++;
   }
  return 0;
}
Print Solid Rhombus
      ****
     ****
    ****
  ****
****
#include <iostream>
using namespace std;
int main() {
   int n;
  cin >> n;
   for (int i = 1; i <= n; i++) {
       for (int j = 1; j \le n - i; j++) {
           cout << " ";
       }
       for (int j = 1; j <= n; j++) {
```

```
cout << "\n";</pre>
   }
  return 0;
}
Print Hollow Rhombus
       ****
****
#include <iostream>
using namespace std;
